August 2018

Dear Parents:

The Fargo Public Schools will begin operation of the Energy Saver Bus Routes on Thursday, August 23, 2018. The routes and system are similar to last year, but there have been some changes. Please check the enclosed routes to determine which route your children will be riding.

In some instances, a mandatory walk-out area or walk zone will be in effect. This area is a ½ mile distance based on surface street distance from the attending school. Students within this area are ineligible for transportation.

Please note that the buses will only stop at those points indicated on the route schedule. This is necessary because time constraints do not allow for a stop at every corner. The buses will not leave early, but they will also not delay their schedule waiting for passengers. Most afternoon schedules will run in reverse from the morning runs.

Please note the Regulations for Students Riding Fargo School Buses on the following page. If riding the school bus is an integral part of your child’s transportation, you are asked to review these regulations with your children. Riding the bus is a privilege that can be revoked by the building principal for inappropriate behavior.

**DISCLAIMER**

All first and last runs of the day on Energy Saver Routes are subject to modification or cancellation depending upon ridership. These routes could be modified or changed with one week’s notice.

Calls regarding transportation can be forwarded to Fargo Public Schools, Transportation Dept. 446-1016, or Valley Bus Co. 235-5912.

Thank you.
